

March 26, 1996

Ms. Theresa Keegan, Editorial Page Editor  
*The Antioch Ledger Dispatch*  
P.O. Box 2299  
Antioch, CA 94531-2299

Dear Ms. Keegan:

Something is happening right now that could affect the very land your readers live on for the next fifty years.

The CALFED Bay-Delta Program, a joint effort of the federal and state governments, is developing a long-range solution for a wide array of resource management problems in the Bay-Delta. I would like to meet briefly with your editorial board for an update on critical developments now unfolding through the Program.

Whether farmers or urbanites, fishermen or water-skiers, your readers depend strongly on the region where the San Francisco Bay meets the Sacramento-San Joaquin River Delta -- the Bay-Delta. In addition to irrigating California's billion-dollar agricultural economy, the Bay-Delta provides two-thirds of the state's water for homes and businesses. This region is also the west coast's largest estuary, with 70,000 acres of wetlands and a unique and fragile ecosystem. The Delta levees, slowly deteriorating and threatened by earthquake and flood, are for some of your readers the primary protection against regular catastrophe.

The CALFED Bay-Delta Program brings your readers together with other Californians to address Bay-Delta problems relating to ecosystem health, water quality, water supply, and system vulnerability. The Program is now poised to release a refined list of alternative solutions to these problems, solutions that have been developed from more than 10,000 total hours of public participation and that could affect your readers far into the future.

During our meeting, I would hope to answer your questions about how each alternative solution could affect your region, about how your readers can get involved in the CALFED process, and about important milestones you will want to report on over the next two years.

Ms. Keegan, my office will contact you shortly to determine when it might be convenient for us to meet. In the meantime, if you have any questions or would like to request further information about the CALFED Bay-Delta Program, please do not hesitate to call at (916) 657-2666.

Thank you for your consideration.

Sincerely,
